WORK EXPERIENCE

Software Engineer

Barnksforte technologies

📅 2021 - current 📍 Abuja, Nigeria.

- **Developed The 2023 National NPC Census Recruitment Phase Website**
- Led the development of a website for the National Population Commission (NPC) census recruitment test phase.
- Implemented a system to collect agents' data and facilitate their registration for the upcoming national census activity.
- Utilised React and Redux Toolkit for efficient state management and an enhanced user interface.
- **Designed MTN Mobile Device Contactless Agents Admin Portal**
- Spearheaded the creation of an admin portal for MTN's mobile device contactless agents.
- Implemented functionalities allowing seamless onboarding of agents and facilitated efficient tracking of monitoring activities by the admin.
- The portal, accessible at <https://mtn.verxid.site>, serves as a centralized platform for overseeing and managing agent-related operations.
- **National Electronic Vital Registration (EVRS) Admin System**
- Spearheaded the end-to-end development of the National Electronic Vital Registration (EVRS) Admin System, a comprehensive solution aimed at tracking vital events such as birth registrations, deaths, stillbirths, and attestations on a national scale.
- Engineered a robust and scalable admin system that efficiently manages and monitors vital events across the country.
- Implemented features for streamlined birth registrations, tracking of deaths and stillbirths, and facilitation of attestation processes, ensuring accurate and up-to-date vital statistics.
